## BENEFITS:

- Flexible mapping and configuration options
- Efficient one-click imports with the ability to save mapping templates and pre-defined import routines
- Easily transfer orders from your eCommerce site to Macola
- Ensure data is accurate by reducing manual intervention
- Notifications and error logs are emailed to users saving time and clicks

## FEATURES:

This tool allows users to import directly from an Excel spreadsheet or tabular data source. The tool uses dynamic, user defined mapping capabilities and has the configuration capability to embed dynamic logic based on data. Defaults can be set for fields as required. Import settings can be saved as templates and imports can be run in a pre-defined sequence. This tool allow the ability to create new customers, vendors, items and update existing records.

## THIS IS COMPATIBLE WITH:

- Macola 10
- Macola ES
- Progression
