EMAIL: [sales@harvestvi.com](mailto:sales@harvestvi.com)

### BENEFITS:

The Credit Card Processing tool offers flexibility in terms of when a credit card is authorized and/or pre-authorized. The tool allows information to be stored until merchandise has been shipped so that re-keying is not required. Integration with Macola means that data is stored within Macola tables for ease of retrieval and tracking. Additionally, Credit Card Processing enables users to safely manage credit card data in an encrypted format. Credit Card Processing can accept multiple credit cards and/or forms of payment for one order. All major credit cards are accepted which means that you will no longer require a separate POS terminal and phone line.

### FEATURES:

From the Macola Order Entry screen, you can: capture and verify credit card information, authorize/pre-authorize payments and apply multiple forms of payment and multiple payments of cash/cheque/ credit card to an order. There are multiple transaction types that are supported, which include: pre-authorization, purchase, customer payments and re-authorize. Credit card information can be captured without creating transactions in Macola. The tool allows for full integration between credit card charges and Macola cash receipts

### THIS IS COMPATIBLE WITH:

- Macola 10
- Macola ES
